## Leads Its Field in Style and Refinements

THE New Series Pontiac Six was designed and built in the belief that everybody admires style in a motor car.

So, in Pontiac Six, everybody can enjoy it!

Beautifully-proportioned bodies that tell their Fisher craftsmanship at a glance . . . Long, low lines and deep, massive radiator design . . . Rich harmonies of color in exterior Duo and interior trim . . . Delightful evidence of luxury in upholstery and appointments . . . PLUS the smoothness of Pontiac's powerful "Six" engine . . . the safety of Four Wheel Brakes and the comfort of Lovejoy Hydraulic Shock Absorbers.

No wonder the New Series Pontiac Six literally leads its field in style and refinement. Prove it all for yourself by a demonstration.

Ask your dealer about the G.M.C. Deferred Payment Plan which makes buying easy.

## Meet Your Friends in Oyen Monday At The Baseball Tournament

Oyen's first annual baseball tournament, celebrating the King's birth day, will be held on Monday June 4, Sharp at 12:30 umpire Chas. P. Snyder, will in his own inimitable way call out "Play Ball" and the day will be off to an official start.

Every endeavour will be made to provide a good day's sport for the fans, and as four outside teams have already intimated that they will be present, a lively contest tournament is practically assured. Prizes will be awarded on the basis of wins. For each win up to the final game, teams will receive a cash prize of \$25. The winning team of the final game will receive a prize of \$50. Byes will not be counted as wins. The team winning the tournament will receive from the Oyen Theatre management, free tickets to the show and dance.

## Second Fortnightly Crop Report

Issued by Department of Agriculture, Government of Alberta, May 28

Seeding of wheat is practically completed throughout the province and from forty to fifty per cent of coarse grains have been sown, according to telegraphic reports received on Friday, by the Department of Agriculture.

The reports to date indicate that there will be some increase on wheat acreage over that of 1927 largely owing to the amount of winter wheat sown, and as newly broken last year. Quite a number of farmers are still holding some of their stubble ground in the hope that rain may come within the next few days, in which case wheat will be sown up to the first of June.

Much of the success of the present season's crop depends on rainfall in the near future, as precipitation during the month of May has been considerably below the average, and the prevalence of high winds over a large part of the province has greatly reduced the supply of moisture in the soil. A number of districts report that rain is necessary before satisfactory germination will take place and in certain areas, of lighter land losses from soil drifting are reported.

Early sown crop on summer-fallow land, however, is doing well and is from four to six inches in height in many localities. The percentage of crop established in this season is somewhat higher than usual.

In some southern districts the alfalfa crop is in need of moisture where irrigation has been delayed. A fair stand of sugar beets is reported, cutworms having caused considerable damage in some fields.

In the Peace River section the season is ahead of last year and the crop on summer-fallow is promising but grain seed-ling on stubble land requires rain to ensure an even stand.

## To Test Value of Phosphate Fertilizer

Experimenters to test the value of superphosphate fertilizer for Alberta crops are being conducted at a number of points in the province this season under the direction of the Chief Commissioner W. J. Stephen. This material which is a by-product of the smelters at Trail B.C., is being supplied free of charge by the Canadian Pacific Railway. An increased yield in dry years of from three to five bushels per acre due to the increased use of the material is experienced as the result of experience with this fertilizer in Australia and experiments carried out at various points in western Canada by the C.P.R.

Tests of the value of this material under Alberta conditions are being made at Blundell and Winifred under the direction of District Agriculturist James Murray, at points in the Lethbridge Northern Irrigation District by District Agriculturist M. L. Frenz, at Selkirk by District Agriculturist H. W. Scott, at Gleichen by J. McNeil, at the Glendon, Okla. and Raymond schools of Agriculture, at the Lethbridge Experimental Farm, at Oliver, and in area of burnt-off soil west of Edmonton. The work is being carried on with the assistance of a number of farmers in each of these districts, and it is hoped that some valuable information will be secured.

## Northern Railway Business Doubled

The volume of business handled over the E.D. and B.C. and Central Canada railway lines in the northern part of the province during the first three months of the present year is more than twice as great as in the corresponding period of 1927, announced Hon. V. W. Smith, Minister of Railways. The improvement as indicated by the quarterly figures of the Department, applies to both freight and passenger traffic and the northern lines are now making the best showing in their history.

The contractors are already at work on the construction of the fifteen mile extension from Whitecourt to Wainwright and it is expected that the contract will be completed by November 1. A part of the twenty-five mile extension from Wainwright to Hinton is being held up pending the passing of the authorizing legislation at Ottawa.

# Some Interesting Speculations As To What Future Holds For The Development Of Canada

Discussing the most recent estimate of Canada's national wealth, placing this at \$200,000,000, or \$25,700 per head of population, the Monthly Journal of the British Empire Chamber of Commerce states that "to make comparison with the United States it would be necessary to multiply Canada's wealth by twelve" in order to equate population. This would give the Dominion an aggregate of \$2,400,000,000, a sum that does not differ greatly from the estimate of the national wealth of the United States made for 1925. The Journal sees reason to believe that the national wealth of Canada will expand at a rate its great neighbor "will find it hard to exceed from the percentage standpoint." While the respective rates of increase will naturally be a matter of strong interest a much more important consideration relating to the development of the Dominion can be found elsewhere.

This was touched upon recently by the New York Times in its position that Canada is in a position to profit, proportionately, more than the United States, for every advance made and to be made by science. Its industrialists and statesmen are so situated that they may guide their activities not only by the successes of the United States but by the constructive results of waste and wanton destruction, the possibilities of conservation and replacement of natural resources, are an open book to which chapters are added every day from experiment and experience. Machinery consequently far more efficient than anything now known, develops today only speculatively projected as remote possibilities. Transportation facilities that will make waste even more plentiful, and which are being planned to cut marvels save energy and immature, where legislation and improved practices, then lacking, suggest, but do not define, the advantages that will arise in the future as they unlock the treasure house of natural resources.

What is true of development in Canada is true of every other land. The United States, however, there is no measuring stick by which may be even faintly suggested the stupendous potentialities of tomorrow's utilization of the earth and the fullness thereof by man if he exercises his common sense. The Dominion, in the New York paper pronouncements, have given many exhibitions of possession of that endowment.

## Planting Seed From The Plane

**Reforestation Scheme Is Idea Of Large Pulp Company**  
Whole forests may spring up if the plane of a large pulp company to plant trees from aeroplanes are carried out this summer, as was forecast at a recent meeting of the Royal Canadian Institute. Grass seed was successfully sown from aeroplanes in the United States last summer, with the result that efforts will be made to sprinkle tree seeds from the same as part of a reforestation scheme in Northern Quebec. More than 250 square miles of forest a day could be planted if the project were feasible.

**Dairy Factories In Canada**  
The latest returns show that the number of dairy factories in the Dominion in Canada is 3,047. The total is made up of 1,209 creameries, 1,418 cheese factories, 334 factories making butter and cheese, and 96 factories making condensed and evaporated milk powders, etc.

**Western Honey Production**  
Manitoba and the other Prairie Provinces are increasing their production of honey much more rapidly than the eastern provinces, and last year they produced the biggest crop in their history, according to C. B. Gooderham, Dominion Apiarist.

## WORLD TRADE IN NEWSPRINT PAPER

Canada's Exports Exceed Those Of All Other Countries Combined

### FIVE CHIEF EXPORTERS NEWSPRINT PAPER 1927

According to the best data available, the total export of newsprint paper, different producing countries in 1927 was slightly more than 3,000,000 tons. Canada's export shipments accounted for over 60 per cent. of this total and the balance was contributed by some fifteen countries. Sweden, Norway, Newfoundland and Finland, each exporting less than 200,000 tons, were fairly closely grouped, while Germany and Great Britain had the major shares of the remaining trade. The diagram is based on figures published recently by the Newspaper Service Bureau.

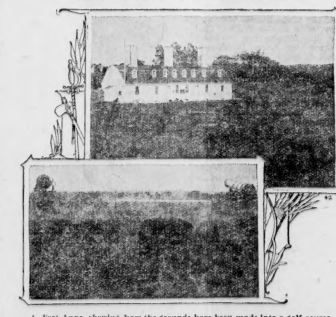

The Dominion's commanding position in the field of international commerce is, for the time being, beyond dispute, but it should also be a constant and effective reminder that the Canadian people have a greater business stake in forest protection and conservation than any other people in the world.

### Shipped Himself C.O.D.

**German Immigrant Discovered In Packing Case On New York Pier**  
Equipped with his passport and a visa as a guest immigrant, and mailed into a packing case consigned C.O.D. to himself at a fictitious address in New York, John Phoenix, 19 years old, of Düsseldorf, Germany, who took this method of stowing away on a trans-Atlantic liner, was discovered only after he had been unboxed on to the pier in New York. A checker, turning a loose board on the case, thrust his hand in to investigate, and Phoenix, without thinking, shook it. The checker ran down the pier shouting that he had been bitten by an animal. The box was opened and Phoenix stepped out. He was found, and his first demand was for food. He explained that after he had received his visa he found he had not enough money to travel to the United States, so, with the help of a friend, he constructed the box. It contained blankets, a cord hammock, a five-gallon jar of water and a supply of sausage, hamper and chocolate. While the ship was at sea he loomed a board and was able to get out and walk around, but could find any additional supplies.

**Will Represent Canada**  
Mrs. Edith Rogers, only woman representative in the Maritime League, and Hon. Peter Heenan, Minister of Labor in the Dominion Government, will represent Canada at the international Labor conference to be held at Geneva under the auspices of the League of Nations this summer. Mrs. Rogers has been notified by Rt. Hon. W. L. Mackenzie King, Prime Minister, of her appointment.

### OLD FORT IS NOW MUSEUM

It was in the year 1604 that the Annapolis Island became known as "Fort Royal"—the royal harbour—named by Samuel De Champlain, who was second in command to Timothee Pierre du Gast, Sieur de Monville when he entered with a small battalion the sheet of water now known as the Annapolis Basin. The name finally attached itself to the surrounding settlement and was known as such until the British conquest in 1710, when the place was renamed in honor of Queen Anne, Annapolis Royal. After a period of years the country was restored to France and D'Aunay erected the first fort on the present site, about the year 1635. The foundation of one bastion of D'Aunay's fort is still to be seen. The fort, after being burned and rebuilt on several occasions was finally left for all time, and not appearing to have any particular uses during the French occupation, the articles of capitulation simply refer to it as the "Fort of Port Royal." Nor was any distinctive name given to it by the English, but later it came to be known as Fort Anne. Today the fort houses a splendid museum, an object of much interest to the beholder, beautiful in its natural setting—replete of history and romance and adorned with memorable names and deeds.

## Canadian Mining Industry Appears To Be On The Eve Of Great Revival And Expansion

With the development of the present century has also come the necessity of again revising the older estimate of the Dominion not of the place it is destined to hold in the world economy. Until comparatively recent years, even in the judgment of well-informed individuals, Canada as a habitation of civilized people comprised only a fringe of productive soil lying between the northern wilderness of ice and snow and the northern border of the United States. Nor has that view entirely disappeared on this continent, for it is still voiced occasionally by public men and the press of the Republic. Yet we who are privileged to live in this favored land know how wide of the mark that judgment was and how little it is in accord with the actualities of the present. Still, it is well to remember the old estimate as a warning of the future.

Even that other and more reasonable opinion that divided Canada roughly into six parts, three prairie provinces and the Pacific coast is no longer as true as it was once. Manitoba, the nucleus of a grain-growing region, is becoming an important manufacturing centre and is daily increasing its prospect of raising its no remote, among the centres of the mining area of the Dominion. Nor is there any sound reason for assuming that prospects to those already known rather are the geological and metallurgical experts justified in their assurance that prospects as yet unexplored have only a little superficial scratching and uncovered but examples of the wealth that is to be in the ancient formations that form the crust of the earth a portion of Canada from the Atlantic to the Pacific.

According to the Department of Mines issued its preliminary report on the mineral production of the country for the value of the mineral output for 1927, at \$24,000,000, an increase of 4.00 million dollars, or 17 per cent. over the previous twelve months' production. "The further statement is made that—

"New output records for all time were established in gold, copper, lead, zinc and silver. The output of gold in the non-metal, and structural materials used. Values for natural gas, petroleum products, also increased as recorded in previous years.

Accorded outputs, in comparison with totals for 1926, were noted in the figures for arsenic, cobalt, copper, gold, lead, nickel, platinum, metals, silver, zinc, and other metals, pyrites, clay products, cement, limestone, sand and gravel."

These figures are the official view are compared in the annual report of the Department for the fiscal year ending on March 31, 1927, prepared under the direction of the Hon. Charles Campbell, Deputy Minister. After noting the expanding value of the mineral and Canadian output and the additions constantly being made to the areas under exploration, he pens this enthusiastic summary of the present position and future prospects of the mineral industry. In his own words:

"In addition to the extent of Canada's physical field for further development, which in itself furnishes a reasonable basis for confidence in the growth of Canadian mining, there are a number of other factors that have a vital bearing on the outlook. Great technical advances have been made in prospecting methods and in mining and metallurgical practice, and Canada is now better equipped in personnel for the future in mining development. The intelligent interest aroused throughout the country in recent years is a force in itself, and as a result of the close relations existing between the universities, government departments, and the mining industry, the Dominion is gradually being better equipped with engineers, geologists, metallurgists, and other technical staffs. Through field laboratory investigations and in other ways, both Federal and Provincial Governments are assisting the development of mining. Moreover, the railway companies, banks, and other business interests, have become deeply interested with the development of mining and are giving it a measure of attention already great, and likely to increase as development continues. It may, therefore, be said that there is behind the Canadian mining industry a strength of support which leaves little doubt that the industry will be able to advance through any lack of competent business or technical backing."

**What It Stood For**  
Sight-seeing Guide (on rubber-sock wagon): And, ladies and gentlemen, on your right you see a monument erected last year to a notable cause. Inquisitive Old Lady: And what does it stand for?  
The Guide (sotto voce): Because, madam, it would look silly lying down.

The trout can move through water at the rate of thirty miles an hour.

"Mother, you remember the teacher who was ill?"  
"Yes, you are crying because he is dead?"  
"No, he has recovered!"  
"He, Paris."

With the development of the present century has also come the necessity of again revising the older estimate of the Dominion not of the place it is destined to hold in the world economy. Until comparatively recent years, even in the judgment of well-informed individuals, Canada as a habitation of civilized people comprised only a fringe of productive soil lying between the northern wilderness of ice and snow and the northern border of the United States. Nor has that view entirely disappeared on this continent, for it is still voiced occasionally by public men and the press of the Republic. Yet we who are privileged to live in this favored land know how wide of the mark that judgment was and how little it is in accord with the actualities of the present. Still, it is well to remember the old estimate as a warning of the future.

Even that other and more reasonable opinion that divided Canada roughly into six parts, three prairie provinces and the Pacific coast is no longer as true as it was once. Manitoba, the nucleus of a grain-growing region, is becoming an important manufacturing centre and is daily increasing its prospect of raising its no remote, among the centres of the mining area of the Dominion. Nor is there any sound reason for assuming that prospects to those already known rather are the geological and metallurgical experts justified in their assurance that prospects as yet unexplored have only a little superficial scratching and uncovered but examples of the wealth that is to be in the ancient formations that form the crust of the earth a portion of Canada from the Atlantic to the Pacific.

According to the Department of Mines issued its preliminary report on the mineral production of the country for the value of the mineral output for 1927, at \$24,000,000, an increase of 4.00 million dollars, or 17 per cent. over the previous twelve months' production. May 27	..	..	11 inch
May 29	..	..	27 inch
Total			1.18

Dr. McPhail Goes  
To Kindersley

Dr. W. D. McPhail, who during the last two years has been practicing his profession in partnership with Dr. Swartzlander, left last Monday for Kindersley.

During his residence here Dr. McPhail has won the confidence and respect of the community, and his departure for Kindersley is very keenly regretted by his many friends and patients.

In the partnership agreement between Dr. Swartzlander and Dr. McPhail, a clause provided that at the termination of the contract between the said doctors, Dr. McPhail was not to practice within a radius of 25 miles of the village of Oyen for a period of 15 years.

Miss Mariel May has been transferred to High River, where she will commence her duties in the government telephone exchange on June 1.

She will leave Oyen next Saturday. Her place on the local exchange staff will be taken by Miss Josephine Lero. Miss M. Fleeth will join the staff as night operator.

Mr. and Mrs. Charles Boholz and family of Saskatoon, were guests at the home of Mr. and Mrs. W. V. Miller last Thursday.

Mr. D. E. May has received an appointment as policeman for the Red Deer district, from the Massey-Harris Company.

## About Town and Country

Fly a flag Sunday and Monday.

Don't forget Oyen's first annual baseball tournament on Monday, June 4, celebrating the King's birthday.

James McQueen, district engineer, was an Oyen visitor yesterday, in connection with work on the main highway. It is understood that maintenance work between Hanna and Alaskah has been commenced.

The dance held in George Mehl's new barn last Wednesday was most enjoyable affair. A big crowd turned out for the event and everyone had a good time.

## Beautifying Village With Trees

During the last two weeks the village council have set out in the neighbourhood of two hundred trees. These have been planted in the boulevards of the village as follows: First Avenue, between First and Second Streets; Third Avenue, between Main and Second Streets, the north side of Fourth Avenue, between Main and First Streets on the east side of First Street between First and Third Avenues and on the east side of Main Street between Third and Fourth Avenues. A few replacements have been made on Second Avenue.

Given care and attention for a few years, these trees will beautify the village and more than justify the expense of putting them in. A glance along Second Avenue today, answers the question "Is it worth while". The trees are beautiful.

Residents are particularly asked to co-operate with the village council in protecting the trees set out in front of their properties, from damage by stock or children and keep at least a small space surrounding each tree, free from weeds or grass.

## Co-operation Asked In Compiling Annual Agricultural Statistics

Similar arrangements to those used in previous years have been made by the Dominion Bureau of Statistics and the Provincial Department of Agriculture for the collection and publication of the annual agricultural statistics for Alberta for 1928. These statistics will be based upon returns to be collected during the month of June from individual farmers upon cardboard schedules issued to them through the teachers and children of rural schools.

This schedule used is a very simple one, calling only for the areas sown to field crops and the numbers of farm animals alive on the farm in mid-June. Upon the resulting estimates of total areas sown are based the preliminary, provisional and final estimates of yield, which are of great importance in connection with the movement, financing, distribution and sale of the principal cereals, especially of wheat of which Canada is now the world's leading exporter.

In order that the statistics secured may be as accurate as possible, it is hoped that farmers in the province will not fail to render the small service required by filling in and returning the schedule issued. Any farmer who has not received a schedule card by the middle of June can secure this by writing the Publicity Commissioner, Department of Agriculture, Edmonton.

## Province to keep Northern Railways

The Alberta Government has decided to reject the joint offer made by the C.P.R. and the C.N.R. for the Edmonton, Dunvegan and British Columbia railway line into the Peace River. It was announced by Premier Brownlee in Calgary on Friday. This decision has been reached as a result of the refusal of the Canadian National to make a second and better offer for the Alberta and Great Waterways line, and the Government maintains its position of not wishing to dispose of one of its northern lines and retain the other.

During June and July, Wednesday half-holiday will be observed by the business men of Oyen. Stores will close sharp at 1 o'clock.

Born—To Mr. and Mrs. John Shields of Oyen, on Friday, May 25, at Cereal Hospital, a daughter.

Alaskah, Marengo, Loverina, Chinook and Sedalia have signified their intention to be present at the ball tournament in Oyen next Monday.

Miss Sylvia Le Marchant was the guest of the Women's Guild of All Saints Church this afternoon, at the home of Mrs. J. Long, when Mrs. J. H. Lowe, on behalf of the guild, presented the bride elect a beautiful Italian cut work luncheon set.

Oyen ball team lost to Chinook in their first game at Alaskah last Thursday, taking the short end of a 2-3 score in a five inning game. Local fans are satisfied that the team will give a good account of themselves in Oyen on Monday.

Two showers on Sunday afternoon precipitated 11 inch. Yesterday's rainfall amounted to 27 inch. Cooler weather prevails this week.

Rev. and Mrs. H. C. Woods returned last night from Edmonton, where Rev. Woods attended the annual conference of the United Church of Canada.

An afternoon tea and sale of home cooking will be held under the auspices of the C.W.L., on Saturday, June 9, at Purcell's store.

Mr. George J. Benbow  
PIANIST AND TEACHER

SEDAN \$1450

CHRYSLER "62" performance—  
at new lower prices emphasizes Chrysler "62" superiority.

62 miles an hour plus—smooth, easy miles, 7-bearing crankshaft in perfect balance. Flashing acceleration in traffic. Unusual hill climbing ability. The easiest car to steer.

Chassis spring ends mounted in rubber shock insulators. Hydraulic four-wheel brakes always perfectly self-equalized for positive safety.

Chrysler stylish lines and appearance. Roomy bodies. Saddle spring seating. Unusual fineness in fittings and upholstery. Latest shades and tones in color combinations.

Take the wheel of a "62." That's the place where you can most easily prove that it is everything a car should be and does everything a car should do.

THE CANADIAN-BUILT CHRYSLER FOR CANADIANS

"Establishing A New Standard in Automobiles"

When You  
DRIVE THE DURANT  
"65"

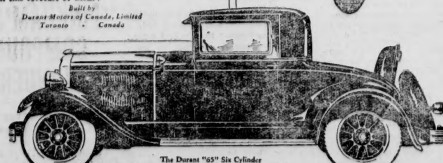

... you'll say, "Here is a car that gives me quicker acceleration, more power, more speed and easier sustained driving than I ever thought could be had in any car at its price."

You will notice the quick, soft action of the Bendix 4-wheel brakes, the safety features of the full vision windshield and the little effort required to handle the Durant "65" in traffic.

Your passengers will be equally enthusiastic regarding the comfort of rear-seat riding and the quality of the two-tone upholstery and interior appointments.

Go to your nearest Durant dealer ... drive the Durant "65" ... take your friends along ... and see if your impressions do not agree with this forecast of them!
